

**⚠ WARNING:** CHOKING HAZARD. Small parts. Not for children under 3 years. Adult assembly is required.

**NOTE:** Refer to Owner's Manual for any addition information.

### STEPS:

- Remove Seat per Owner's Manual.
- Disconnect and remove Battery - Controller is under Battery.
- Remove Connectors - It's recommended to take a picture or make a simple drawing of how Connectors (A) are attached to Controller (B) before removing.
  - **TIP:** A small flat-blade screwdriver may help push in the Connector lock tabs (C) for easier removal.
  - **TIP:** It may be easier to remove Controller Screws (D) first for easier access to Connectors - next step.
- Remove two Screws (D) (one on each side of Controller - set aside).
- Remove Controller.
- Position new Controller in same position as original and re-install the two mounting screws (D).
  - **TIP:** Pre-install Screws partially in Controller before positioning in place.
- Attach all Connectors (A) in same position as original

### NOTES:

- Connector with BLUE wire (E) connects into first location.
  - Position remaining two Connectors as shown in view (F).
  - Connectors should 'CLICK' into place.
- Reinstall Battery and Seat according to Owner's Manual.
